

DANIEL AREVALO

Lead Product Experience Designer born in Colombia, settled in Norway. My skills help teams learn, engage, and iterate until the best solutions are found. I specialize in bridging OT/IT environments and developing enterprise software through human-centered design. I enjoy designing functional and usable products that augment the human capacity with Agentic AI.

Oslo, Norway

ABOUT

I'm a Lead Product Experience Designer sitting at the intersection of research, design, and product strategy. My focus right now is on improving how customers onboard data and work with the Omny platform to complete specialized workflows in cybersecurity. The current product is highly configurable and includes the dynamic visualization of data related to different security domains. Omny's user experience is further enhanced by conversational assistant implemented with the latest developments in Agentic AI architecture.

Due to the adoption of AI, designers are capable of moving into more strategic, integrating roles that require not just crafting interfaces, but connecting the dots between product, marketing, and engineering. In a lot of ways, my role is filling both the product designer and the product manager functions in one. It complements the capacity to analyze business goals with a design sensibility for user needs, taste, craft, and a deep focus on how products actually feel to use. And now with AI in the mix, I can move faster on research synthesis, prototyping, and exploring ideas. All of this frees up more headspace for the strategic work and enables a faster and clearer communication with engineering.

A big part of my job involves running research sessions with our internal professional services team. They deploy and customize the platform for customers, so they see all the pain points firsthand. I take what I hear, synthesize it into clear prioritized problems, and work with engineering and sales to figure out what to tackle and in what order. I'm pretty methodical. I like breaking messy problems into discrete pieces, backing everything up with real user quotes, and using frameworks like impact vs. effort to get alignment. I facilitate workshops with the shape-up methodology and can run company-wide dot voting sessions to prioritize friction points, encourage ownership and move from research to action.

WORK EXPERIENCE

Omny AS, Oslo, Norway

Lead Product Experience designer

2024 - 2026

- Product experience designer of software securing critical infrastructure operations (energy, manufacturing, utilities) against cyber threats across operational technology environments.
- Established discovery-execution framework bridging Professional Services insights with engineering roadmaps across 3 teams, translating customer workflows into prioritized requirements and designing end-to-end experiences for Asset Owner, IT/OT Engineers, CISO, and SOC Operator personas.
- Led product onboarding project through workflow mapping and UI design collaboration, creating "ready-to-build" specifications that reduced engineering clarification cycles while facilitating cross-functional alignment and conducting user research with critical infrastructure operators across European markets.

Forsta AS, Oslo, Norway

Lead UX designer

2021 - 2024

- Forsta provides Customer Experience and Research Technology for some of the world's most ambitious organisations. Leading all UI and UX design efforts regarding the Reporting Vertical conformed by Dashboard Studio, Genius Text Analytics and Forsta Visualizations.
- My role requires designing mockups or prototypes, conducting user research and coordinating teams to implement solutions to increase ease of use, user engagement and customer satisfaction so businesses can capture, analyse and respond to customer and market feedback across multiple channels and sources in real-time.
- Working together with product managers to apply methodologies, implement processes and coordinate different teams with a strategy that aims to augment the impact of design on the business and the company's culture.

Confirmit AS, Oslo, Norway

Senior UX designer

2019 - 2021

- Confirmit's industry-leading insight software and services help businesses listen to customers, markets and employees. In charge of UX/UI design for Dashboard Studio and Genius Text Analytics that facilitate companies to process large amounts of quantitate and qualitative unstructured data and take action to drive business growth.
- I also contribute to building a unified design system to increase the productivity and efficiency of the tasks that require cooperation within the design team while ensuring consistency by frontend developers.

WORK EXPERIENCE (CONTINUED)

AW Initiative AS, Oslo, Norway

Co-founder, Product Designer

2018 - 2019

- Product Design and Development Agency. Developing Ruvikas, an Enterprise Blockchain Platform that supports transparent and accountable social development by connecting Communities, Companies and Contractors (NGOs) via smart contracts on a proprietary Blockchain to facilitate and automate the certification, management, and auditing of data of companies carrying out CSR projects. Other projects: Heibots.com, Recman.no, Arcomex.co.

Glimty AS, Oslo, Norway

Co-founder, CPO

2015 - 2018

- Online Marketplace of Norwegian Brands that want to sell their products as gift alternatives via e-commerce or a chatbot on Facebook Messenger.

The Ivy Faculty Consortium, Cambridge, Massachusetts

IT Development Consultant

2014 - 2017

- Design and implement solutions that improves the communication channel between the client companies and the network of leading educators affiliated with Ivy League universities.

Electrical, Electronic & Telecommunications Engineering School (E3T-UIS), Santander, Colombia

Automation Engineer

2013 - 2014

- Develop a user interface to display and interact with the Building Automation System (BAS) to monitor information and provide remote access to the operational data of a green building.

Electrical & Computer Engineering Department at Texas A&M University, College Station, USA

Research Assistant

2012 - 2013

- Conduct collaborative research on VLSI circuit design and mixed-signal interfaces. Collaborate with the proper development of proposals and journal articles.

EDUCATION

Norwegian University of Science and Technology (NTNU), Gjøvik, Norway

Master's Degree in Interaction Design

2014-2018

University of Oslo (UiO), Oslo, Norway

Master's Degree in Innovation and Entrepreneurship

2015-2017

Harvard University Extension School, Cambridge, Massachusetts

Instructional Design Studio, Creative Explorations in Screen-Based and Physical Computing

2013-2014

Universidad Industrial de Santander (UIS), Bucaramanga, Colombia

Bachelor of Science in Electronic Engineering

2007-2013

MITx Global Entrepreneurship Bootcamp, Cambridge, Massachusetts

Bootcamper

2015

- The bootcamp is a talent reunion, in-person training and intensive mentorship program at MIT. This is a highly selective program for highly motivated entrepreneurs. Boot-campers are challenged to start a world-changing company.

Texas A&M University J. Wayne Stark Northeast Trip, Memorial Student Center (MSC)

Trip Director and Coordinator for Philadelphia

2012

- Working with nation's most outstanding and prestigious business schools and universities in Chicago, Boston, New York, and Philadelphia. Set up campus tours, information sessions, and class visits while overseeing travel from one school to another. Strengthening relations with contacts, universities and organisations after the trip was over.

Universidad de los Andes, Bogotá, Colombia

Coveted Exchange Program for Electrical and Electronic Engineering Students

2011

- Design digital, analog and mixed signals systems. Implement industrial instrumentation and domotic installations and services. Work on several electronic engineering and design projects.

Free Software University Community (CUSOL), Bucaramanga, Colombia

Director and Event Coordinator

2010

- Promote the use of free software and hardware technologies in developing countries. Logistic and Social Coordinator for the Free Software Culture Festival.

Electrical and Electronic Engineering Student Center (UIS), Bucaramanga, Colombia

Academic Coordinator for E3T School

2010

- Help in the Integration and Cooperation between teachers and Students.

AWARDS

- **Xynteo Exchange**, selected startup 2018
- **HackN'Go**, Award Most Social Potential 2018
- **Venture Cup 2018**, National Finalist in Business Model competition
- **ChangemakerXchange Paris**, Program attendee 2018
- **Start-up Weekend Oslo**, Best Idea Award 2018
- **Norwegian Research Council**, STUD-ENT Grant 2017
- **Smart Mobility Hackathon**, Award Winner 2016
- **Start-up grant from Innovation Norway**, Phase 1: Premarket Evaluation 2015
- **Inven2Start Package**, Funding for entrepreneurs 2015
- **Harvard University Extension School**, 1st place: Emanuel and Lilly Shinagel Prize Fund (Top Level) 2014
- **Universidad Industrial de Santander**, Distinguished GPA Scholarship 2010

SKILLS

AI-native interaction designer. Product engineer that prototypes with code. User experience expert that conducts usability testing and product validation. Service designer able to synthesize large volumes of user research into actionable insights. Able to manage and integrate teams across multiple disciplines such as software development, hardware and physical computing, marketing, project management, R&D and engineering. Wide experience with innovation management, strategic planning, entrepreneurship, leadership and negotiation.

Tools: Figma, Procreate, Webflow, Framer, Storybook, JIRA, Cursor, Anthropic's Claude Code, OpenAI's ChatGPT Codex, Google's Gemini Nano Banana, Antigravity, Lovable, Github, N8N, Perplexity.

LANGUAGES

English (Full Professional Proficiency), Spanish (Native), Norwegian (Intermediate), Japanese (Basic).

INTERESTS

Entrepreneurship and Innovation, Web Technologies, AI, Automation, Robotics, Machine Learning, Blockchain, Photography, Longboarding, and Japanese Cuisine.
